APRIL '26 INSIGHTS

Accelerated Computing Enterprise is the Indian arm of Cloud Ace Group.

Cloud Ace was established in Japan in 2014 and became the first Managed Service Provider (MSP) for Google Cloud in the country. Cloud Ace have won the Google partner of the year award in 2018 & 2021 as we continued to grow our business to other part of Asia and now we are expanding into Europe, North and South America as well as Africa.

We can help you in digital transformation by modernizing your infrastructure with best in-class cloud-native and cloud advisory services.

OUR MISSION

Build our work on Honesty.

It is our mission with an unwavering pride that we are always aware of as we work to realize our vision; not just being honest, but “Honesty itself is our work and our service.”

OUR VISION

To contribute to building a world where all people can utilize advanced technology and realize the dreams they have envisioned.

We aspire to build a world where every person in the world can achieve their ambitions through the use of advanced technology. Our vision is to create such a world and help those who want to achieve it.

OUR COMMITMENT

As Google Cloud Partners, we are committed to providing our clients with cutting-edge technologies and exceptional customer service. Our team of experts is trained and certified to help you leverage the full potential of the Google Cloud Platform, from cloud storage and networking to machine learning and artificial intelligence.

SPECIALIZATION

This achievement reflects our continued commitment to delivering exceptional cloud solutions and deep technical expertise on the Google Cloud Platform (GCP). More importantly, it enables us to offer you enhanced support through Google Funding, specifically for any Engineer Support work related to GCP.

What this means for our Clients:

- Access to Google-backed funding to support your cloud engineering initiatives
- Priority support from certified experts across various GCP services
- Improved delivery capabilities and faster time-to-value for your projects
- Recognition that you're working with a trusted, Google-verified partner

We'd love to explore how we can leverage this specialization to add more value to your current or upcoming cloud initiatives. Please let me know a convenient time for a quick call or feel free to reply here — we're excited to help you get started.

Looking forward to continuing our collaboration with even more momentum!

SPECIALIZATION

Infrastructure

Google Cloud

OUR SERVICES

Managed & Consulting Services

Our Managed & Consulting Services Portfolio includes Cloud Infrastructure Services, Cloud Migration Assessment & Planning, Billing & Cost Optimisation, Monitoring, Security, Incident Management and on-going Support Activities.

System Migration, Design, Development & Automation

We provide Application Development, Modernisation Solutions, Cloud Migration Deployment & Optimisation, POCs, Infrastructure Orchestration & Continuous Improvement Activities.

Multi-Cloud, Hybrid Cloud, Backup & Recovery Solutions

If our Customers have Multi-cloud or Hybrid Cloud needs, as Google Cloud Partners, we can help them manage the most Complex Cloud Environments.

AI/ML, Gen AI, Data Engineering, Reporting & IoT Services:

We specialise in providing AI/ML and GenAI Solutions. We can also help our Customers with Data Warehousing, Data Analytics, Dashboarding & Reporting Solutions on top of Google Cloud's Data Services.

Training & Adaptation

Our Certified Professional Google Certified Trainers can help you in Training to ensure that your Team & your Customers are Knowledgeable in GCP & GWS Best Practices, which can inspire Client Confidence.

Google Workspace

We provide Google Workspace Deployment & Migration Business Solutions for setting up Gmail, Google Drive, Google Calendar and other Productivity tools.

OUR GLOBAL COLLABORATION

Expanding Our Global Collaboration to Strengthen Google Cloud Project Delivery in India

At Cloud Ace, we take pride in being one of the leading Google Cloud Partners globally, with a strong footprint across multiple markets. As a Japanese cloud technology company, our commitment to delivering high-quality cloud solutions has always been at the heart of everything we do.

In India, the demand for Google Cloud SI&C (System Integration & Consulting) projects continues to grow rapidly. To ensure we meet and exceed client expectations while maintaining the highest standards of delivery, we are now actively collaborating with our global divisions—including teams from Japan, Vietnam, Hong Kong, and Indonesia.

This strategic collaboration allows us to leverage engineering talent and technical expertise across borders, enhancing our delivery capabilities and ensuring timely execution of projects in India. By aligning with our overseas teams, we aim to bring the best of global knowledge and experience to our local engagements.

This is a significant step forward in our mission to provide reliable, scalable, and future-ready Google Cloud solutions to enterprises in India.

Together, across borders, we continue to build smarter with the cloud.

The Rise of the AI Teammate: Mastering Agentic AI with Gemini Enterprise

In 2024, we talked about "chatting" with AI. In 2025, we focused on "generating" with AI. But here in 2026, the conversation has shifted entirely. We are no longer just talking to LLMs; we are delegating to Agents.

Agentic AI represents the next evolution of productivity—moving from passive assistants that answer questions to active "teammates" that execute complex, multi-step workflows autonomously. At the center of this revolution is Gemini Enterprise, the definitive platform for orchestrating these digital workforces.

What is Agentic AI?

Traditional AI follows a "point-and-shoot" model: you give a prompt, and it gives a response. Agentic AI is different. It possesses reasoning, memory, and tool-use capabilities.

An agent doesn't just write a sales email; it identifies the lead in your CRM, researches their recent LinkedIn posts, cross-references your product documentation via Retrieval-Augmented Generation (RAG), and drafts a personalized sequence—all while checking your calendar to suggest a meeting time.

Why Gemini Enterprise is the 2026 Standard

Google's Gemini Enterprise tier has transformed from a simple workspace upgrade into a full-scale Agentic Hub. Here's how it enables the next generation of work:

1. The Power of Gemini 3 Models

Gemini Enterprise provides access to the Gemini 3 family. Specifically, Gemini 3 Flash has become the industry "workhorse" for agents. It offers Pro-level reasoning at near-zero latency, allowing agents to process live data streams and make split-second decisions without the high cost of older frontier models.

2. Agent Designer (No-Code Orchestration)

You no longer need a computer science degree to build a task-force. The Agent Designer in Gemini Enterprise allows business users to create custom agents through natural language.

- The Prompt is the Blueprint: You describe the agent's goal (e.g., "Manage my vendor invoices").
- Built-in Memory: Agents can now utilize Memory Banks to remember preferences and past interactions across sessions.

3. The Agent-to-Agent (A2A) Protocol

Perhaps the most significant breakthrough of 2026 is the A2A Protocol. This allows specialized agents to "talk" to one another.

Example: Your Research Agent finds a market trend and automatically "hands off" the data to your Content Agent, which then notifies your Compliance Agent for approval.

4. The Agent-to-Agent (A2A) Protocol

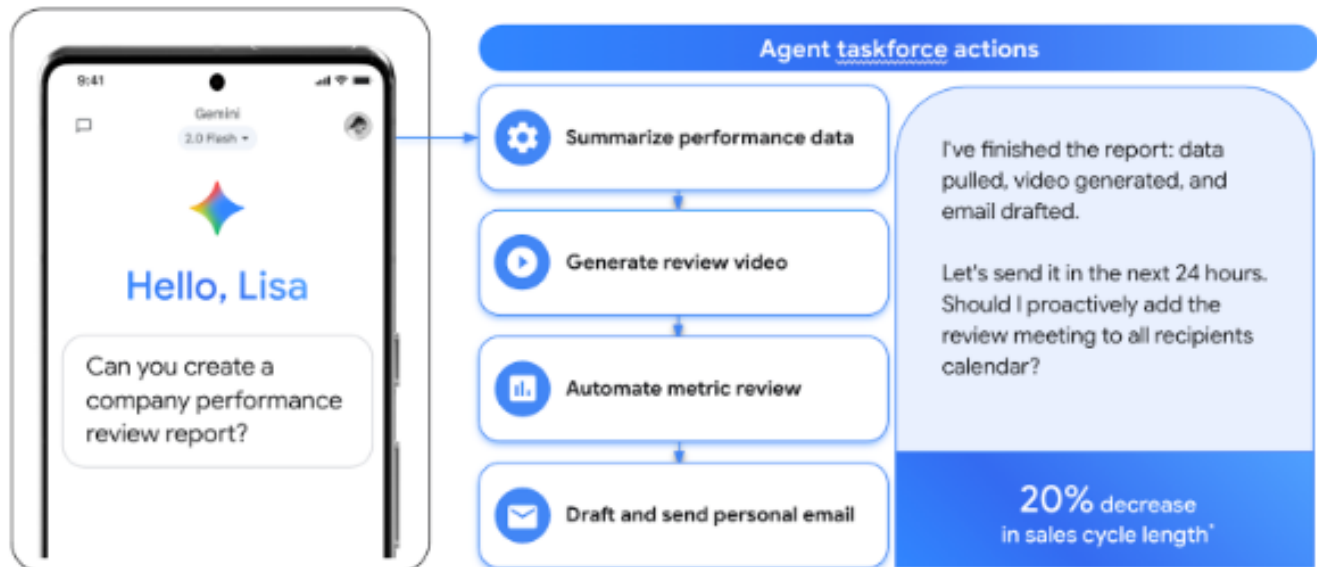

Agents are only as good as the data they can see. Gemini Enterprise uses MCP to securely connect to your entire stack:

- Google Workspace (Docs, Sheets, Gmail)
- Enterprise Apps (Salesforce, SAP, ServiceNow, Jira)
- Public Truth: Real-time grounding via Google Search and Google Maps.

Real-World Use Cases: Agents in Action

Department	Agentic Workflow
Sales	Agents monitor CRM triggers to auto-generate personalized pitch decks and schedule follow-ups.
Engineering	Coding agents use Terminal-Bench capabilities to fix bugs, run tests in sandboxed environments, and submit PRs.
Marketing	"Deep Research" agents analyze global market shifts and adjust ad spend across platforms in real-time.
HR	Onboarding agents guide new hires through paperwork, hardware setup, and training modules autonomously.

Gemini Enterprise brings **simplicity, speed, and creativity** to cross-departmental work

Security: The "Enterprise" in Gemini Enterprise

Delegating tasks to agents requires a massive amount of trust. Google has addressed this with Model Armor and VPC-Service Controls.

- **Data Sovereignty:** Your corporate data is never used to train the global Gemini models.
- **Auditability:** Every action taken by an agent—every tool used and every "thought" it had—is logged for compliance and transparency.

Conclusion: From Users to Orchestrators

In 2026, the competitive advantage doesn't come from being the best "prompter"—it comes from being the best orchestrator. By leveraging Gemini Enterprise, organizations are moving away from manual drudgery and toward a future where "getting things done" is as simple as hiring the right AI agent for the job.

Is your team ready to stop chatting and start doing?

CUSTOMER SUCCESS HIGHLIGHTS

Leading Insurance Provider

A leading insurance company partnered with Cloud Ace India to enhance their cloud efficiency and scalability. We supported them in optimizing their monthly cloud expenditure while also introducing greater billing flexibility. Additionally, our team worked closely to address and resolve critical quota challenges, ensuring seamless operations on Google Cloud.

Bengaluru-Based Construction Materials Wholesaler

A prominent wholesaler specializing in construction materials engaged Cloud Ace India to streamline their cloud costs. Through our optimization strategies, we enabled improved cost visibility and efficiency across their Google Cloud environment, helping them achieve better financial control over their infrastructure.

Pune-Based Healthcare Company

A healthcare organization in Pune collaborated with Cloud Ace India as their trusted Google Cloud partner. We are supporting them in optimizing their cloud spend while also guiding them through their ongoing cloud journey, ensuring a scalable, secure, and future-ready infrastructure.

UPCOMING EVENT

Gemini Enterprise on Road

24th April 2026 | 3:00 PM - 5:00 PM IST

WeWork Forum, DLF Cyber City Rd, DLF Phase 3,
Sector 24, Gurugram, Haryana 122002

Excited to share that Cloud Ace India is hosting an exclusive Gemini Enterprise on Road event in Gurgaon on 24th April 2026!

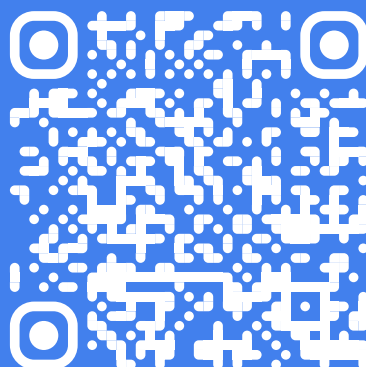

As a proud Google Cloud partner in India and across JAPAC and Brazil, we are committed to helping organizations unlock the true potential of AI and next-generation cloud technologies. This event is designed for leaders and innovators who want to stay ahead in an AI-first world.

Join us to:

- Explore the power of Gemini Enterprise and its real-world applications
- Engage with our Cloud-Ace experts and industry peers
- Discover how to future-proof your technology landscape
- Live demos, use cases, and custom AI agent possibilities
