

 Gemini 3.1 Pro

MARCH '26 INSIGHTS

**Accelerated Computing Enterprise
is the Indian arm of Cloud Ace Group.**

Cloud Ace was established in Japan in 2014 and became the first Managed Service Provider (MSP) for Google Cloud in the country. Cloud Ace have won the Google partner of the year award in 2018 & 2021 as we continued to grow our business to other part of Asia and now we are expanding into Europe, North and South America as well as Africa.

We can help you in digital transformation by modernizing your infrastructure with best in-class cloud-native and cloud advisory services.

Inside This Issue

- Our Mission, Vision & Commitment

Happy Clients

OUR MISSION

Build our work on Honesty.

It is our mission with an unwavering pride that we are always aware of as we work to realize our vision; not just being honest, but “Honesty itself is our work and our service.”

OUR VISION

To contribute to building a world where all people can utilize advanced technology and realize the dreams they have envisioned.

We aspire to build a world where every person in the world can achieve their ambitions through the use of advanced technology. Our vision is to create such a world and help those who want to achieve it.

OUR COMMITMENT

As Google Cloud Partners, we are committed to providing our clients with cutting-edge technologies and exceptional customer service. Our team of experts is trained and certified to help you leverage the full potential of the Google Cloud Platform, from cloud storage and networking to machine learning and artificial intelligence.

SPECIALIZATION

This achievement reflects our continued commitment to delivering exceptional cloud solutions and deep technical expertise on the Google Cloud Platform (GCP). More importantly, it enables us to offer you enhanced support through Google Funding, specifically for any Engineer Support work related to GCP.

What this means for our Clients:

- Access to Google-backed funding to support your cloud engineering initiatives
- Priority support from certified experts across various GCP services
- Improved delivery capabilities and faster time-to-value for your projects
- Recognition that you're working with a trusted, Google-verified partner

We'd love to explore how we can leverage this specialization to add more value to your current or upcoming cloud initiatives. Please let me know a convenient time for a quick call or feel free to reply here — we're excited to help you get started.

Looking forward to continuing our collaboration with even more momentum!

SPECIALIZATION

Infrastructure

Google Cloud

OUR SERVICES

Managed & Consulting Services

Our Managed & Consulting Services Portfolio includes Cloud Infrastructure Services, Cloud Migration Assessment & Planning, Billing & Cost Optimisation, Monitoring, Security, Incident Management and on-going Support Activities.

System Migration, Design, Development & Automation

We provide Application Development, Modernisation Solutions, Cloud Migration Deployment & Optimisation, POCs, Infrastructure Orchestration & Continuous Improvement Activities.

Multi-Cloud, Hybrid Cloud, Backup & Recovery Solutions

If our Customers have Multi-cloud or Hybrid Cloud needs, as Google Cloud Partners, we can help them manage the most Complex Cloud Environments.

AI/ML, Gen AI, Data Engineering, Reporting & IoT Services:

We specialise in providing AI/ML and GenAI Solutions. We can also help our Customers with Data Warehousing, Data Analytics, Dashboarding & Reporting Solutions on top of Google Cloud's Data Services.

Training & Adaptation

Our Certified Professional Google Certified Trainers can help you in Training to ensure that your Team & your Customers are Knowledgeable in GCP & GWS Best Practices, which can inspire Client Confidence.

Google Workspace

We provide Google Workspace Deployment & Migration Business Solutions for setting up Gmail, Google Drive, Google Calendar and other Productivity tools.

OUR GLOBAL COLLABORATION

Expanding Our Global Collaboration to Strengthen Google Cloud Project Delivery in India

At Cloud Ace, we take pride in being one of the leading Google Cloud Partners globally, with a strong footprint across multiple markets. As a Japanese cloud technology company, our commitment to delivering high-quality cloud solutions has always been at the heart of everything we do.

In India, the demand for Google Cloud SI&C (System Integration & Consulting) projects continues to grow rapidly. To ensure we meet and exceed client expectations while maintaining the highest standards of delivery, we are now actively collaborating with our global divisions—including teams from Japan, Vietnam, Hong Kong, and Indonesia.

This strategic collaboration allows us to leverage engineering talent and technical expertise across borders, enhancing our delivery capabilities and ensuring timely execution of projects in India. By aligning with our overseas teams, we aim to bring the best of global knowledge and experience to our local engagements.

This is a significant step forward in our mission to provide reliable, scalable, and future-ready Google Cloud solutions to enterprises in India.

Together, across borders, we continue to build smarter with the cloud.

Gemini 3.1 Pro: Solving "Deep Reasoning" Business Logic

The release of Gemini 3.1 Pro on February 19, 2026, represents more than just a software update; it is a fundamental shift in how large language models (LLMs) operate in a professional environment.

In the 2026 digital economy, the primary differentiator is no longer "generative speed" but "reasoning depth"—the ability for a model to maintain logical consistency across thousands of pages of data and complex tool integrations.

The Reasoning Breakthrough: Skyrocketing Benchmarks

The defining metric of the 3.1 series is its performance on the ARC-AGI-2 benchmark. Designed by the ARC Prize, this test evaluates a system's ability to solve novel logic puzzles that require abstraction—problems the model has never seen in its training data.

- 2.5x Performance Jump: Gemini 3.1 Pro achieved a verified score of 77.1%, up from the 31.1% of the previous generation.
- The Competitive Edge: This score places Gemini significantly ahead of 2026 rivals like Claude Opus 4.6 (68.8%) and GPT-5.2 (52.9%).
- Scientific Mastery: The model also hit a record 94.3% on GPQA Diamond, which tests graduate-level knowledge in biology, chemistry, and physics.

New Technical Standards for 2026

Gemini 3.1 Pro fixes several "production pain points" that slowed down AI adoption in 2025. It utilizes a refined Sparse Mixture-of-Experts (MoE) architecture, allowing it to scale context without skyrocketing costs.

Feature	Specification	Business Impact
Input Context	1,048,576 tokens	Ingest entire codebases or 8+ hours of audio in one prompt. ¹⁰
Output Ceiling	65,536 tokens	Fixed Truncation: No more responses cutting off mid-sentence during long reports. ¹⁰
Thinking Levels	4-Tier Control	Choose from Minimal, Low, Medium, or High reasoning modes.
Knowledge Cutoff	January 2025	Informed by the most recent global datasets and events.

Solving Industry-Specific Logic

Where Gemini 3.1 Pro truly separates itself is in specialized "vertical" logic, where accuracy gains have been transformative.

1. Legal and Compliance (74% Accuracy)

Legal teams are seeing a 17-percentage-point improvement in accuracy. The model no longer just flags keywords; it applies "directionality tests" to understand liability. In one case study, it correctly reasoned that a neighbor's own modifications—not the defendant's—created a privacy violation, saving hours of human review time.

2. Healthcare and Life Sciences (67% Accuracy)

In clinical settings, accuracy jumped by 20 percentage points due to enhanced arithmetic precision.¹⁹ It can now accurately calculate Relative Percentage Differences (RPD) in neonatal clinical data and handle "statistical noise" that previously led to errors in report drafting.¹⁹

3. Finance and Data Analysis (86.55% Accuracy)

The model can process 1,000 invoices in a single query, identifying patterns and anomalies across a massive data view. In multi-step logical deduction tasks, it consumes 35% fewer tokens than previous models, making high-volume financial auditing more sustainable.

Core Innovation: The "Thinking Level" Gearbox

One of the most practical additions is the `thinking_level` parameter. In 2026, compute is a strategic resource, and this feature allows developers to modulate how much "brainpower" is used for a task:

- **Low Mode:** Optimized for simple instructions, high-throughput chat, and low latency.
- **Medium Mode:** A new "sweet spot" for balanced reasoning; ideal for standard document extraction and summarization.
- **High Mode:** Maxes out reasoning depth for scientific research, heavy refactoring, and long-horizon planning.

Strategic Summary: When to Use Gemini 3.1 Pro

While Gemini 3.1 Pro is the dominant force in raw reasoning, the 2026 landscape is multi-model.

- **Choose Gemini 3.1 Pro for:** Heavy logic, scientific synthesis, massive document analysis (1M context), and budget-sensitive automated agents.
- **Choose Claude Opus 4.6 for:** Expert narrative writing, human-preference tasks, and GUI-based "computer use" workflows where Claude still holds a slight edge.
- **Choose GPT-5.3-Codex for:** Specialized agentic terminal coding and diverse software engineering tasks.

The 2026 Recommendation: Organizations should integrate Gemini 3.1 Pro immediately for data-heavy and logic-intensive workflows. By leveraging "Thinking Levels" and "Thought Signatures," you can finally build AI systems that act as reliable, high-reasoning teammates rather than simple digital assistants.

NEW CLIENT

ALPHANSO TECHNOLOGY

Alphanso Technology is where intelligent media meets next-generation technology. It operates at the intersection of Visual AI, broadcasting, and digital content distribution — building advanced platforms that convert video, data, and audience engagement into measurable value.

What we did:

They appreciated our services, and we also assisted them in resolving their quota-related issues on GCP, ensuring smooth and uninterrupted operations for their platform.

Bhasha Guard

Bhasha Guard provides powerful AI tools for journalists and content creators, including advanced spell checking, grammar correction for Indian languages.

What we did:

We explained the available partner benefits, including discounts and support services. Based on this, the client chose to avail the benefits, and we successfully onboarded the client under Cloud Ace partner billing.
