

MAY '26 INSIGHTS

Accelerated Computing Enterprise is the Indian arm of Cloud Ace Group.

Cloud Ace was established in Japan in 2014 and became the first Managed Service Provider (MSP) for Google Cloud in the country. Cloud Ace have won the Google partner of the year award in 2018 & 2021 as we continued to grow our business to other part of Asia and now we are expanding into Europe, North and South America as well as Africa.

We can help you in digital transformation by modernizing your infrastructure with best in-class cloud-native and cloud advisory services.

Happy Clients

OUR MISSION

Build our work on Honesty.

It is our mission with an unwavering pride that we are always aware of as we work to realize our vision; not just being honest, but “Honesty itself is our work and our service.”

OUR VISION

To contribute to building a world where all people can utilize advanced technology and realize the dreams they have envisioned.

We aspire to build a world where every person in the world can achieve their ambitions through the use of advanced technology. Our vision is to create such a world and help those who want to achieve it.

OUR COMMITMENT

As Google Cloud Partners, we are committed to providing our clients with cutting-edge technologies and exceptional customer service. Our team of experts is trained and certified to help you leverage the full potential of the Google Cloud Platform, from cloud storage and networking to machine learning and artificial intelligence.

SPECIALIZATION

This achievement reflects our continued commitment to delivering exceptional cloud solutions and deep technical expertise on the Google Cloud Platform (GCP). More importantly, it enables us to offer you enhanced support through Google Funding, specifically for any Engineer Support work related to GCP.

What this means for our Clients:

- Access to Google-backed funding to support your cloud engineering initiatives
- Priority support from certified experts across various GCP services
- Improved delivery capabilities and faster time-to-value for your projects
- Recognition that you're working with a trusted, Google-verified partner

We'd love to explore how we can leverage this specialization to add more value to your current or upcoming cloud initiatives. Please let me know a convenient time for a quick call or feel free to reply here — we're excited to help you get started.

Looking forward to continuing our collaboration with even more momentum!

SPECIALIZATION

Infrastructure

Google Cloud

OUR SERVICES

Managed & Consulting Services

Our Managed & Consulting Services Portfolio includes Cloud Infrastructure Services, Cloud Migration Assessment & Planning, Billing & Cost Optimisation, Monitoring, Security, Incident Management and on-going Support Activities.

System Migration, Design, Development & Automation

We provide Application Development, Modernisation Solutions, Cloud Migration Deployment & Optimisation, POCs, Infrastructure Orchestration & Continuous Improvement Activities.

Multi-Cloud, Hybrid Cloud, Backup & Recovery Solutions

If our Customers have Multi-cloud or Hybrid Cloud needs, as Google Cloud Partners, we can help them manage the most Complex Cloud Environments.

AI/ML, Gen AI, Data Engineering, Reporting & IoT Services:

We specialise in providing AI/ML and GenAI Solutions. We can also help our Customers with Data Warehousing, Data Analytics, Dashboarding & Reporting Solutions on top of Google Cloud's Data Services.

Training & Adaptation

Our Certified Professional Google Certified Trainers can help you in Training to ensure that your Team & your Customers are Knowledgeable in GCP & GWS Best Practices, which can inspire Client Confidence.

Google Workspace

We provide Google Workspace Deployment & Migration Business Solutions for setting up Gmail, Google Drive, Google Calendar and other Productivity tools.

OUR GLOBAL COLLABORATION

Expanding Our Global Collaboration to Strengthen Google Cloud Project Delivery in India

At Cloud Ace, we take pride in being one of the leading Google Cloud Partners globally, with a strong footprint across multiple markets. As a Japanese cloud technology company, our commitment to delivering high-quality cloud solutions has always been at the heart of everything we do.

In India, the demand for Google Cloud SI&C (System Integration & Consulting) projects continues to grow rapidly. To ensure we meet and exceed client expectations while maintaining the highest standards of delivery, we are now actively collaborating with our global divisions—including teams from Japan, Vietnam, Hong Kong, and Indonesia.

This strategic collaboration allows us to leverage engineering talent and technical expertise across borders, enhancing our delivery capabilities and ensuring timely execution of projects in India. By aligning with our overseas teams, we aim to bring the best of global knowledge and experience to our local engagements.

This is a significant step forward in our mission to provide reliable, scalable, and future-ready Google Cloud solutions to enterprises in India.

Together, across borders, we continue to build smarter with the cloud.

CAIN TEAM ACHIEVEMENT

We are delighted to share a proud achievement from our Cloud Ace India team.

Congratulations to our Cloud Engineer, Aniket Tayade, for successfully earning two prestigious Google Cloud Professional certifications in April 2026:

These accomplishments reflect Aniket's dedication, technical expertise, and continuous learning mindset in the evolving cloud and AI landscape. Achieving these certifications demonstrates strong capabilities in designing scalable cloud architectures and building advanced machine learning solutions on Google Cloud.

At Cloud Ace India, we strongly encourage continuous innovation, upskilling, and professional growth, and we are proud to see our team members achieving such significant milestones in their cloud journey.

Congratulations once again to Aniket on this remarkable achievement, and we wish him continued success ahead.

GLIMPS OF EVENT

Gemini Enterprise on Road

Date: 24th April 2026 | Venue: WeWork Forum | Time: 3:00 PM – 5:00 PM

A Glimpse Into the Future of Enterprise AI

The Gemini Enterprise on Road event brought together innovators, tech leaders, and forward-thinking professionals for an engaging and insightful experience. Hosted in a collaborative setting at WeWork Forum, the event was a perfect blend of knowledge-sharing, live demonstrations, and meaningful conversations.

Meaningful Connections That Matter

From the moment the event began, it was clear that this wasn't just another tech session. Attendees actively engaged in discussions, exchanged ideas, and built valuable connections that extended beyond the room.

Every interaction contributed to a shared vision — embracing innovation and preparing for the future of cloud-powered enterprises.

Live Demo: Gemini Enterprise in Action

From the moment the event began, it was clear that this wasn't just another tech session. Attendees actively engaged in discussions, exchanged ideas, and built valuable connections that extended beyond the room.

Every interaction contributed to a shared vision — embracing innovation and preparing for the future of cloud-powered enterprises.

The People Behind the Experience

Behind every successful event is a passionate team. The Cloud Ace and Google Cloud teams came together with a shared goal — to create an impactful and insightful experience for every attendee.

Their dedication ensured a seamless event filled with valuable insights and engaging moments.

Welcome to the Agentic Era: The Biggest Drops from Google Cloud Next '26

We have officially entered the era of the “Agentic Enterprise”—a shift where AI doesn't just assist us, but autonomously perceives, reasons, and executes complex workflows. Creating user-focused content in this era means providing valuable, relevant material that answers a reader's specific questions rather than just promoting a product. Here are the major breakthroughs you need to know.

1. Intelligence and Development: Gemini 3.1 & Agent Studio:

Google introduced the Gemini Enterprise Agent Platform, designed for teams to build and scale AI agents. The platform is powered by the new Gemini 3.1 Pro for complex reasoning and Gemini 3.1 Flash Image for rapid visual generation. These tools allow organizations to address specific user intents—informational, navigational, commercial, or transactional—by crafting relevant, targeted responses. The new low-code Agent Studio and no-code Agent Designer allow anyone to build digital workers that collaborate, share data via a "Memory Bank," and utilize a centralized "Agent Inbox". To make these agents effective, teams should develop clear user personas and stories that define the agent's role, goal, and the benefit provided to the end-user.

2. Computational Infrastructure: 8th-Gen TPUs & Custom CPUs:

Running millions of AI agents requires massive compute. Google unveiled its 8th-Generation TPUs. The TPU 8t speeds up model training times by 3x, while the TPU 8i is built for cost-effective inference, delivering an 80% better performance-per-dollar ratio. Google also introduced AI-optimized infrastructure like the Virgo Network and custom Arm-based Axion N4A CPUs. This power is essential for enterprises like Nitco Solutions, which require dedicated GPU nodes (such as NVIDIA A100 or H100) to host large language models with up to 130 billion parameters.

3. Data Foundation: The Cross-Cloud Lakehouse:

An agent is only as smart as its data. Google's new Agentic Data Cloud features a Cross-Cloud Lakehouse built on Apache Iceberg, allowing AI agents to access corporate data across AWS, Databricks, and Snowflake. Effective content strategies rely on this data-driven approach to map customer journeys and solve audience pain points. The Gemini-powered Knowledge Catalog further assists by autonomously mapping complex enterprise data relationships.

4. Security and Governance: Agentic SecOps & Wiz Integration:

To secure the new digital workforce, Google launched Agentic SecOps, featuring autonomous agents that hunt for threats. A partnership with Wiz introduced color-coded security agents (Red, Blue, and Green) that remediate vulnerabilities from code to cloud. For organizations like Sheel Chand Agroils, these security layers can be integrated into broader GCP migration strategies that include VPN setups, encrypted storage, and automated disaster recovery.

Conclusion: The Dawn of the Agentic Enterprise

Google Cloud Next '26 will likely be remembered as an inflection point in enterprise technology. The conversation has officially shifted from "what can generative AI write for us?" to "what business processes can autonomous agents completely manage for us?"

By delivering a fully vertically integrated stack—from the ultra-efficient TPU 8i processors and Virgo Networking up to the Gemini 3.1 Pro models and the low-code Agent Studio—Google Cloud is positioning itself not just as a cloud provider, but as the foundational operating system for the AI-driven economy. For the thousands of IT leaders, developers, and executives, the message was clear: The Agentic Era has arrived, and it is ready to scale.

NEW CLIENT

An Emerging AI and Automation Service Provider based in Varanasi UP

An Emerging AI and Automation Company, facing Support related issues and also looking for their cloud cost optimisation. CAIN successfully Onboarded them with the assurance on cost optimization and on the support that they were seeking

A Prominent Consulting firm based in Bengaluru

A prominent consulting firm seeking Google Workspace Services along with a Competent Partner who can not only offer them competitive pricing but can also provide after sales support and best practices around Google Workspace Product line. CAIN Successfully supported them with GWS licenses and the after sales support that they were seeking.
